Auto Foam Surface Sanitizer

A study by the University of Arizona in 2002 found the typical worker's desk has hundreds of times more bacteria per square inch than an office toilet seat. If that's not disturbing enough, desks, phones and other private surfaces are also prime habitats for the viruses that cause colds and flu. (CNN Nov. 13, 2006)

Facts

- Antimicrobial
- It is a broad spectrum hard surface sanitizer
- Meets OSHA Bloodborne Pathogens requirements
- Approved by the USDA for food and non-food contact surfaces
- Kills HIV-1, Hepatitis B, Hepatitis C and drug-resistant bacterial strains and also the Bird Flu virus
- Deodorizes as well as disinfects
- Has low alcohol content (3%)
- Contains no added color or fragrance

Workplace Essentials[®] Foam Surface Sanitizer is effective against 108 disease causing bacteria, yeasts, viruses and molds including:
