

# Feminine Hygiene

## Sanitary Disposal Service

*Workplace Essentials will provide your female employees and visitors with a safer method of sanitary disposal. The risk of exposure to bloodborne pathogens such as Hepatitis B and C is often overlooked. These viruses are extremely dangerous, and are the most common hazard one faces when dealing with this type of waste.*

- **No-touch or hands free operation**

The sanitary disposal unit's automatic no-touch or hands-free designs are truly innovative. When the lid is opened, a masking tray is revealed, concealing the contents of the unit from the user.

- **Convenient and safe**

Women can dispose of their sanitary products without exposure to others' potentially infectious waste.

- **Eliminates unpleasant odors**

The highly effective odor control properties of the neutralizer tackle odor at it's source.

- **Service to suit your needs**

Workplace Essentials' service personnel remove the used units and replace them with fresh ones at predetermined and regular intervals.

**Hands-free** pedal operation or no-touch **Automatic** operation with Braille  
All models available in Gray or Beige.

## Sanitary Disposal Service

**OSHA's Bloodborne Pathogen mandate has forced changes in the way blood and other body fluids are handled, in order to protect from the risk of infection that can be caused by exposure to the Hepatitis B virus. This legislation covers all employees who could be reasonably anticipated, as a result of their job duties, to face contact with blood and other potentially infectious materials.**

- **Provides protection and peace of mind**

The unit contains a micro-perforated sachet of a dry, non-toxic compound which neutralizes the sanitary waste.

- **Safeguards cleaning staff**

Workplace Essentials' Sanitary Disposal Service safeguards cleaning and maintenance staff as they are no longer required to handle and dispose of potentially harmful sanitary waste.

- **Reduces the risk of drain blockage**

Workplace Essentials' Sanitary Disposal Service has been shown to significantly reduce this common problem, as women do not need to flush sanitary products.

DIMENSIONS 16" H x 7 1/2" W x 20 1/2" D.

### Mono-lid Operation

### Duo-lid Operation

## Sanitary Vending Service

**A vital resource to any business, the Workplace Essentials Sanitary Vending Service ensures a reliable and convenient supply of sanitary products for female employees and customers.**

- **Convenient 24 hour supply**

In an emergency, the availability of a napkin or tampon will ensure that your staff and customers remain on your premises.

- **Discreet packaging** ♻️

Both napkins and tampons are dispensed in discreet and attractive Workplace Essentials' packaging (made from recycled paper). A choice of one napkin or two tampons per box.

- **A reliable solution**

Eject previously deposited coins by simply pushing on the drawer before product is dispensed. Incorrect change is immediately rejected.

- **Serviced to suit your needs**

Our service and maintenance personnel will professionally install your vending machine, restock, collect the coinage and check that your machine is in working order on a frequency tailored to your needs.

- **ADA Compliant**

Vending Machines are installed to meet ADA compliance.
